## **1. Initial group security plan**

As well, install a rock wall that is very large (Large enough that a helicopter couldn't safely fly over it), rock to fit the Vermont aesthetic. With turrets mounted on top. It will have openings that will be guarded and monitored by Vermont's finest. Incorporate into major religions that crossing the Vermont border without sanctions from the government is "heresy" and that god will send them to hell if they do. All persons wear horse blinders to prevent them from seeing others' information. Canons help prevent air assaults.

**Clearance – out of state workers** Someone in the government points out that many people work in Vermont who live outside the state. People should be cleared who are approved by the state.

### **1a. Modify your system to accommodate this.**

Incorporate ID cards to make sure they are Vermonters, have them be checked at the border, make sure the additions to the major religions states that if they have an ID card that they can move seamlessly in and out of Vermont without divine punishment.

### **1b. Are there ways of breaking into this system?**

Faking ID cards, bribing guards, not getting the cards back if they have moved to Vermont, Keeping the cards/wall up to date. Holes in walls/tunnels under walls. Air and avian assault could be a risk if we are out of cannon balls.

## **2. people already in the state that have not been cleared to enter**

Require foreigners on some sort of business to have to get a Visa, which they would receive at the border. Have the Visa expire when their business is done. Require business owners to check their visa before they supply them goods or services. The foreigner is required to register for a full ID card before their visa expires.

## **3. All people in a vehicle must be cleared for it to cross the border into Vermont**

Require everyone in the vehicle to show their ID/Visa at the border. If they do not have a Visa, open up the process to give them one.

## **Question 2**

**What about people leaving the state?**

They don't... or they leave by dying. People with Visas are allowed to leave.

**Do we care ?**

No, not particularly. We trust Vermonters.

**4. The contents of a vehicle, passengers luggage and belongings must meet the requirements of the state.**

All files and items and persons must be thoroughly searched.

**Digital files, hardcopy papers, brought in or out must not refer to people in Vermont who have been cleared.**

**This applies to people coming in or leaving the state.**

**Modify the system to accommodate this.**

To acquire a visa, the person must consent to a full search of their persons and vehicle at the border. If any of it fails to comply with protocol we will offer to make it into protocol or simply just reject them, if any terror threat is found it will be dealt with immediately. As a part of this search in, and if anyone leaves, they must allow officers to seize and thoroughly analyze any Digital files/hardcopy papers. If they refuse the analysis it will be treated as them resisting arrest and be treated as a threat to security. If contraband is found it will be treated as a warning the first time, and an arrest the second time.

**5. The state relaxes the requirements to allow more people into Vermont temporarily for summer and autumn**

**Describe changes**

Turrets turned off temporarily. All people are allowed to leave. During these seasons a visa is not required, write that into the religious practices. But each person is required to take a survey when they enter/exit Vermont.

**5a. Are there ways of corrupting, changing the data that is used to get into the state or information being brought in?**

Bribing guards to not take/ change information for you, lying about not on file information, hacks.

**5b. Are there ways of someone getting the data who it was not intended for?**

Bribing guards to gain access to the information, a trusted state employee leaking to the press as a way to revolt, hacks.

#### Final Questions

1. **Does this scenario impact travel in the state of Vermont and do we care?**
  - a. Yes because Vermont will only be open for travel during the Winter and Summer seasons
2. **Is this beneficial or detrimental to people in Vermont? Outside Vermont?**
  - a. This is detrimental in the short term as many people will be unhappy however it will be beneficial to VT's safety in the long term.
3. **Is Vermont safer because of this?**
  - a. While the measures are extreme, overall Vermont would be safer from foreign people.
4. **Are Vermonters' private information more secure because of this?**
  - a. The changes that would be made would more secure Vermont's physical aspect, its cyber one would still be vulnerable. Less so because of less foreign elements in the region.
